

## Creating a web page in Dreamweaver

To create a new web page and save:

1. From the menu, File > New (Ctrl or Cmd +N). Choose blank html document from the window.

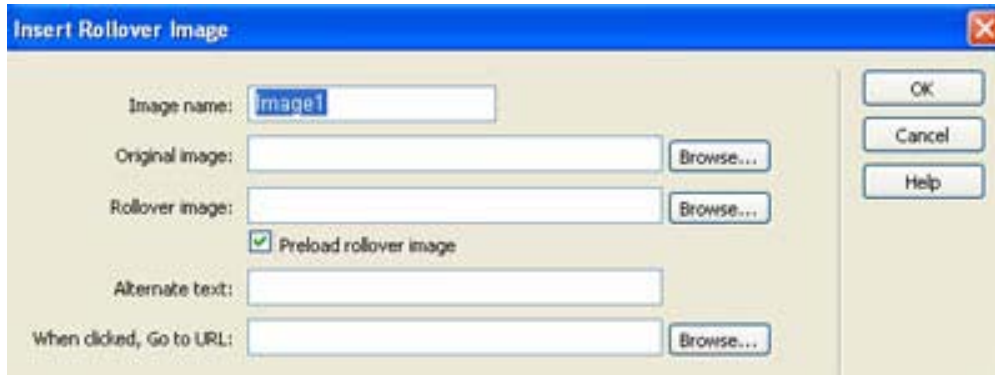

2. Hit the Create button and you will go back to the document view. Save the document as portfolio.html. From the menu, choose File > Save As and save in your root folder.

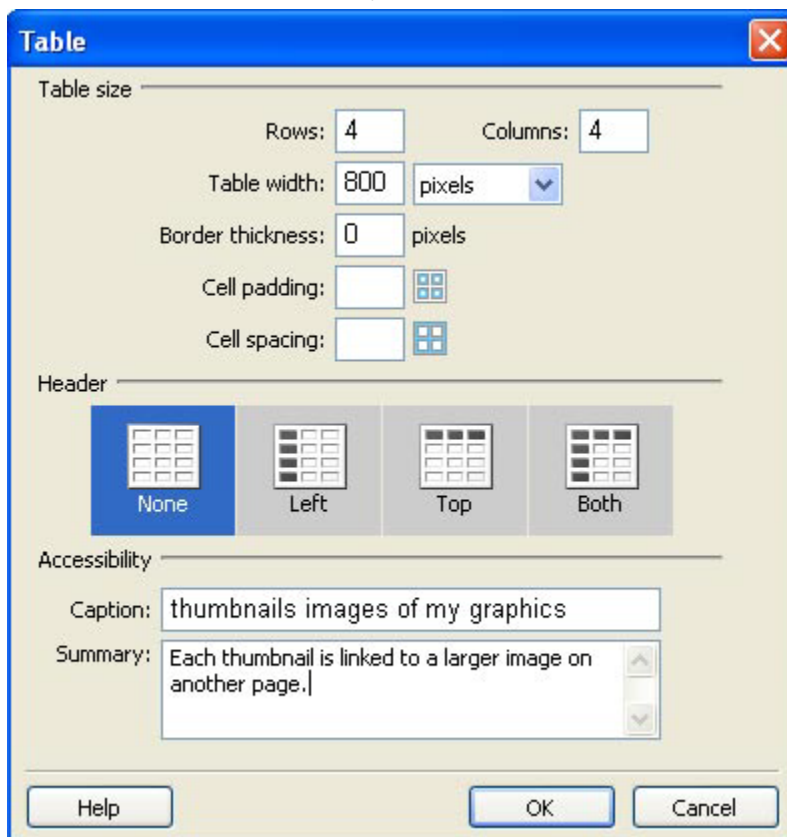

## Creating a web page in Dreamweaver, pg. 2

To inset an image: From the menu, Insert > Image. To insert an rollover image: From the menu, Insert > Image Objects > Rollover Image

Browse to each image using the Browse... button. Don't forget to use the Alternate text and to link. Both can be done in the same window.

To add a table: From the menu, Insert > Table. C

Choose your settings and then click OK.
